Ideation Phase
Brainstorm & Idea Prioritization Template

Date	31 January 2025
Team ID	SWTID-2026-8449
Project Name	Streamlining Ticket Assignment For Efficient Support Operations
Maximum Marks	4 Marks

Step-1: Team Gathering, Collaboration and Select the Problem Statement

The team collaborated to identify key challenges faced in support operations. After discussion, the following problem statement was selected:

Problem Statement:
Manual ticket assignment in support systems leads to delays, incorrect routing, lack of accountability, and inefficient issue resolution.

The team agreed that automating ticket routing based on predefined rules, roles, and groups would significantly improve efficiency and accuracy.

Step-2: Brainstorm, Idea Listing and Grouping

During brainstorming, the team generated multiple ideas without restriction. These ideas were later grouped into relevant categories:

Ideas Generated:

- Manual ticket assignment improvement guidelines
- Automated ticket routing system
- Role-based access control for ticket handling
- AI-based ticket classification
- Priority-based ticket assignment
- Dashboard for ticket monitoring
- Notification system for assigned tickets
- Escalation mechanism for unresolved tickets
- Integration with existing platforms

Idea Grouping:

1. Automation & Workflow

- Automated ticket routing
- Priority-based assignment
- Escalation workflows

2. Access & Security

- Role-based access control
- Group-based ticket handling

3. Monitoring & Visibility

- Dashboard for tracking tickets
- Notifications and alerts

4. Advanced Enhancements

- AI-based classification
- Platform integrations

Step-3: Idea Prioritization

The team evaluated ideas based on **feasibility, impact, and implementation time**.

High Priority Ideas (Selected for Implementation):

- Automated ticket routing system
- Role-based access control
- Group-based ticket assignment
- Workflow-based ticket handling

Medium Priority Ideas:

- Ticket monitoring dashboard
- Notification system
- Escalation mechanism

Low Priority Ideas (Future Scope):

- AI-based ticket classification
- Advanced integrations

Final Decision:

The team decided to implement an **automated ticket routing system using roles, groups, and workflows**, as it offers the highest impact with feasible implementation.
