Project Design Phase-II
Data Flow Diagram & User Stories

Date	31 January 2025
Team ID	SWTID-2026-6846
Project Name	Streamlining Ticket Assignment For Efficient Support Operations
Maximum Marks	4 Marks

Data Flow Diagram (DFD)

Level-0 (Context Diagram)

Entities:

- User / Customer
- Support Team (Certificates / Platform Group)
- Admin

Process:

- Ticket Management System

Data Flow:

1. User submits ticket → System
2. System processes ticket → Applies routing rules
3. Ticket assigned → Support Team
4. Support Team updates status → System
5. System sends updates → User
6. Admin configures roles, groups, workflows

Level-1 DFD (Detailed Flow)

Processes:

1. Ticket Creation
2. Ticket Classification
3. Automated Routing (based on roles/groups)
4. Ticket Handling & Resolution
5. Notification & Status Update

Data Stores:

- User Database
- Ticket Database
- Roles & Groups Database

Flow Explanation:

- User creates ticket → stored in Ticket DB
- System classifies ticket (category/type)
- Routing engine assigns ticket to correct group (e.g., Certificates / Platform)
- Assigned user resolves ticket
- Status updates sent to user

User Stories

Customer (User)

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Customer	Registration	USN-1	As a user, I can register using email & password	User can access dashboard after registration	High	Sprint-1
Customer	Login	USN-2	As a user, I can log in using credentials	User successfully logs into system	High	Sprint-1
Customer	Ticket Creation	USN-3	As a user, I can create a support ticket	Ticket is successfully created	High	Sprint-1
Customer	Track Ticket	USN-4	As a user, I can track my ticket status	User can view real-time updates	High	Sprint-1

Customer Care Executive (Support Team Member)

User Type	Functional Requirement	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release

Support Executive	Ticket Assignment	USN-5	As a support member, I receive tickets automatically	Ticket is assigned based on group/role	High	Sprint-1
Support Executive	Ticket Handling	USN-6	As a support member, I can update ticket status	Status updates are saved and visible	High	Sprint-1
Support Executive	Reassignment	USN-7	As a support member, I can reassign tickets if needed	Ticket moves to correct team	Medium	Sprint-2

Administrator

User Type	Functional Requirement	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Admin	User Management	USN-8	As an admin, I can create users	Users are added successfully	High	Sprint-1
Admin	Role Management	USN-9	As an admin, I can assign roles	Roles are correctly assigned	High	Sprint-1

Admin	Group Management	USN-10	As an admin, I can create groups	Groups are created successfully	High	Sprint-1
Admin	Workflow Automation	USN-11	As an admin, I can configure routing flows	Tickets are auto-assigned based on rules	High	Sprint-1

Customer (Web User) – Optional Extension

User Type	Functional Requirement	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Web User	Dashboard	USN-12	As a user, I can view all my tickets in dashboard	Tickets are displayed correctly	Medium	Sprint-2

Summary

This design ensures:

- Clear **data flow** from ticket creation to resolution
- Efficient **automated routing system**
- Well-defined **user roles and responsibilities**
- Scalable and structured **workflow implementation**
